Bangalore, Karnataka | +91 7267841204 | abhinavdixit204@gmail.com

LinkedIn: abhinav-dixit-0b66b2303 | GitHub: github.com/abhinav0080 | LeetCode: abhinavdixitt

OBJECTIVE

Motivated B.Tech CS & Data Science student at New Horizon College of Engineering with hands-on experience in fullstack development, UI/UX design, and AI-powered systems. Skilled in Python, Java, React.js, Figma, and data visualization tools like Tableau and MySQL. Built 3 real-world projects spanning smart travel tech, AI design automation, and logistics contract management — demonstrating the ability to deliver end-to-end solutions independently. Passionate about building scalable, intelligent systems and contributing to high-impact teams from day one.

EDUCATION

B.Tech - CS & Data Science, New Horizon College of Engineering, Bangalore	2023 - 2027
Class XII, C.M.G Public School	2022
Class X, St. Stephen's School	2020

TECHNICAL SKILLS

Languages: Java, Python

Web Technologies: HTML5, CSS3, JavaScript

Frameworks & Libraries: React.js, Tailwind CSS, Bootstrap

Database: MySQL, SQL

Design Tools: Figma

Data & Analytics: Tableau, Jupyter Notebook

Tools: Git, IntelliJ IDEA, Kali Linux, VS Code, Eclipse

Networking: Cisco Packet Tracer, Wireshark

Concepts: OOP, DSA, REST API, Agile, Data Science, Cybersecurity

PROJECTS

Tourism and Hospitality - Smart Travel Web Application

Tech Stack: Java (JDK 17), MySQL, HTML, CSS, JavaScript, Bootstrap, Apache Tomcat

- Developed a full-stack web application providing personalized travel recommendations using user preference data and behavioral analysis.
- Designed a relational database with 6 datasets (users, travel packages, bookings, reviews, feedback) for efficient data management via SQL queries.
- Built a unified booking system with hotel reservations, travel packages, itinerary planning, and QR code-based check-in functionality using REST API principles.
- Incorporated eco-friendly travel recommendations promoting responsible tourism through data-driven insights.

AI-Powered Interior Design: Personalization, Automation & Intelligent Recommendations *Mar 2026 - Present*

Tech Stack: Python, Deep Learning, NLP, Generative Models, Recommendation Systems

- Designed an AI-based interior design system leveraging deep learning and generative models to deliver automated, personalized design solutions.
- Built a recommendation engine suggesting furniture, layouts, and styles tailored to individual user preferences using visual similarity and NLP.
- Integrated behavioral data analysis to make professional interior design faster, smarter, and accessible — reducing manual design effort significantly.

- Designed a full-scale AI-Powered Logistics Operations Portal on Figma with 8 high-fidelity screens for 3 user roles - CMS Agents, Finance Analysts, and Operations Teams.
- Created DAVT Order Verification UI with AI risk scoring, SLA countdown, confidence-based verification checklist, and evidence viewer for high-speed quality checks.
- Designed end-to-end contract lifecycle workflows: PDF upload, AI clause extraction, playbook generation, and audit-trail decision flows with a component-based design system.
- Currently converting to React.js + Tailwind CSS with mock API integration for full frontend development and implementation.

CERTIFICATION

Cybersecurity Fundamentals MOOC - CySeck (Cyber Security Karnataka)	2024
Database Management System (DBMS) - NPTEL, IIT Madras (Virtual)	May 2026

ACHIEVEMENTS

Stock Market Trading Event - New Horizon College of Engineering	May 2026
---	----------

- Secured Top 10 position among all participating teams in a college-level stock market simulation event.
- Collaborated in a team of 2 to analyze real-time price patterns, identify trends, and execute strategic trades under time pressure.

Competitive Programming - LeetCode

- Regular participant in coding practice on LeetCode, consistently solving problems to strengthen data structures and algorithms skills.

SOFT SKILLS

Problem Solving | Analytical Thinking | Team Collaboration | Quick Learner | Communication Skills | Attention to Detail

ADDITIONAL INFORMATION

- Eligible for Software Engineering Internship.
- Open to remote, hybrid, or onsite internship opportunities.
